

## **COATED KRISPIES**

1. Cut the Rice Krispie Treat sheets into 30 pieces using the template provided (about 2 X 2 1/2 inches each).
2. Using coating (white suggested) “glue” the stick into the center of one of the thinner ends of the krispie treat.
3. Dip into coating and gently shake and scrape off excess.
4. Sprinkles, etc. are required. Apply to all sides except the side opposite the stick. If striping is required, stripe all sides diagonally using stripe bottle before coating starts to harden.
5. Stand on end with stick pointing up.
