

MOLDED MILK LARGE DISK WITH TOPPER

1. Fill mold with coating, using vial or stripe bottle.
2. Remove excess with scraper or rubber spatula.
3. Tap mold flat on table to remove air bubbles.
4. Let harden.
5. Remove from mold.
6. Attach topper by using a dab of coating from stripe bottle.

**Molds must be wiped clean with cotton balls or washed with soap and hot water when they get a cloudy film on them.*
