COATED KRISPIES

- 1. Cut the Rice Krispie Treat sheets into 30 pieces using the template provided (about 2 X 2 1/2 inches each).
- 2. Using coating (white suggested) "glue" the stick into the center of one of the thinner ends of the krispie treat.
- 3. Dip into coating and gently shake and scrape off excess.
- 4. Sprinkles, etc. are required. Apply to all sides except the side opposite the stick. If striping is required, stripe all sides diagonally using stripe bottle before coating starts to harden.
- 5. Stand on end with stick pointing up.
