COATED KRISPIES

- 1. Cut the Rice Krispie Treat sheets into 30 pieces using the template provided (about $2 \times 2 \frac{1}{2}$ inches each).
- 2. Using coating (white suggested) "glue" the stick into the center of one of the thinner ends of the krispie treat.
- 3. Dip into coating and gently shake and scrape off excess.
- 4. Using stripe bottle stripe all sides diagonally with green coating and stripe in the opposite direction with red coating before coating hardens.
- 5. Stand on end with stick pointing up.
