

COATED KRISPIES

1. Cut the Rice Krispie Treat sheets into 30 pieces using the template provided (about 2 x 2 ½ inches each).
2. Using coating (white suggested) “glue” the stick into the center of one of the thinner ends of the krispie treat.
3. Dip into coating and gently shake and scrape off excess.
4. Using stripe bottle stripe all sides diagonally with green coating and stripe in the opposite direction with red coating before coating hardens.
5. Stand on end with stick pointing up.
