

Molded Milk Large Disk with Topper

- Fill mold with coating, using veil or stripe bottle.
- Tap mold to remove air bubbles.
- Let harden.
- Remove from mold.
- Attach topper, using coating from stripe bottle.

*Molds must be wiped clean with cotton balls or washed with soap and hot water when they get a cloudy film on them.

**Toppers can be attached after coating has hardened by using coating applied from a stripe bottle.
